

Natural Resource Management, Wetland, and Environmental Permitting Services

Elizabeth Johnson, Environmental Scientist

Elizabeth Johnson is an environmental professional with a background in environmental regulation, and public-sector program implementation. She has professional experience as a Sustainability Specialist for the City of St. Augustine, where she supported environmental initiatives. Prior to that, she worked as an Environmental Specialist with the Florida Department of Environmental Protection. Elizabeth brings a strong interdisciplinary perspective to environmental assessments, permitting, and listed species surveys. She is also a major part of EW Consultants, Inc. arborist program by conducting numerous native tree inventories and extrapolating the results of those inventories.
